

# Project Name :: Movie Info

## Description

The project is based on facilitating the peoples who love to watch Movies of their respective types. This app will summarize the film so that people have more information and it will gauge their interest in the film.

It will provide the reviews, description and star rating of the movie that will help those with limited money and opportunity to go to the movies decide which film is most worth their time and money.

It will also allow any user to make their own personal add to watch later movie list in their personal id's.

## Contents

```
